To Whom It May Concern:

Watson Accident Reporting is the only crash reporting product available which provides TN Department of Safety compliant crash reporting on a handheld computer. It is also the only commercially available product for use with the TN Department of Safety crash reporting system. Additionally, no other crash reporting system is available that integrates to Watson Field Reporting, the product that Shelby County Sheriff's Office utilizes in the field for electronic capture of field reports. Watson Accident, however, is fully integrated to the Watson Field Reporting Suite providing automated report generation between reports when applicable.

The Watson Accident Reporting module licenses are available only from DataDriven, LLC.

Sincerely,

William S. Harding, Managing Partner
DataDriven, LLC.
